

LED-Light alarm clock

VITAclock® Traveller

LED-LIGHT ALARM CLOCK VITAclock® TRAVELLER VERSATILE USABLE AS LIGHT ALARM CLOCK, READING LAMP AND DAYLIGHT LAMP

The high quality, small and handy LED light alarm clock Traveller has different functions.

FUNCTIONS OF VITAclock® TRAVELLER

- **LED Light alarm clock for the journey with wake-up function**
Pleasant and comfortable wake up by a gentle 30 minutes dawn simulation.
Visual and acoustical wake up program with wake up and snooze function for a successful wake up.
- **Reading lamp with bright and comfortable light for a reading without tiredness on a journey**
The VITAclock Traveller is with his 90 powerful longlife energy saving superbright LEDs very suitable for a journey. The illumination can be varied individually. The light is very comfortable, flicker free and doesn't lead to a tiredness of the eyes even after reading for several hours.
- **Daylight lamp for a journey against jetlag, winter blues and for more energy and well-being**
The very bright and uv-free LED light falls directly into the eyes. The high lighting power up to 2.500 lux in a distance of approx. 26 cm can lead to more energy, well-being and performance within a few days.
